Present

Spencer

Edward

Ethan

Shubas (client)

Sandesh (client)

Sandesh displays aws diagram and ed goes through and describes the user stories within the diagram

Edward talks about creating the aws account with payment system. Will they create the system or will ed have to make it.

- They are going to create it and Sandesh will give it to us

Progress on each stage in the diagram

Machine learning algorithm – we have a mvp

Front end – we will run the ai on html for now but will do that soon enough.

Going onto the front end of it – ethan will have

Spencer going through testing means – testing the machine learning and testing the front end.

Sandesh – going to send through a few documents for everyone to improve everyone's working

We will need a script that will simulate someone buying something from a store.

Edward look into iec and connect aws genesis to sagemaker.

Ethan continue with front end

Spencer continue with testing means

Meeting ends
